

ControllerBase

```
classDiagram
    class ControllerBase {
    }
    class ControllerBase {
    }
    class ControllerBase {
    }
```

The image shows a UML class diagram for a class named ControllerBase. The class is represented by a rectangle divided into three horizontal compartments. The top compartment contains the class name 'ControllerBase'. The middle and bottom compartments are currently empty, representing areas for attributes and operations respectively.
